

SANCHIT NEEMA

Senior Product Manager | AI-Powered SaaS | Global Markets | Platform Strategy

sanchit.neema@gmail.com · +60 13 680 3565 · linkedin.com/in/sanchit-neema-35033 · github.com/sanchit07

PROFESSIONAL SUMMARY

Accomplished Senior Product Manager with 11+ years of end-to-end product leadership across AI-powered B2B SaaS platforms serving global enterprise clients. Unique combination of strategic vision and technical depth: building and scaling platform ecosystems across **order management, transaction systems, and data-driven products**. Led the **platform rearchitecture** (legacy monolith → microservices API-first), built SSO/Auth0 identity infrastructure, shipped Stripe payment systems, integrated ERP/CRM stacks (Salesforce, Oracle NetSuite, HubSpot), and deployed ML recommendation engines. Enabled seamless orchestration across distributed systems while managing P&L, directing cross-functional teams of 15+, and growing annual product revenue to **USD 1M+**. Secured and deployed a USD 10M institutional investment, led an international company acquisition (Adarth, India), and expanded a platform from 5 Asian markets to 20+ countries across APAC, MENA, EMEA, and the Americas.

CORE COMPETENCIES

Product Strategy & Leadership: Product Roadmap & Vision, Go-to-Market Strategy, P&L Ownership, Budget Management, Value Proposition Design, OKRs & KPI Frameworks, Stakeholder Management (C-Suite / Board)

AI & Intelligent Systems: Product Strategy, Recommendation Engine, Predictive Analytics, LLM Application Design (Research: DBA Thesis), ML Model Productisation, Programmatic Algorithms, AI Automation Pipelines

AI Development Tools: Replit (AI-assisted prototyping & rapid development), Claude Code (agentic coding & product spec automation), Antigravity (AI workflow tooling)

Platform & Technical Architecture: Microservices Architecture, API-first Design, RESTful APIs, Legacy System Modernisation, SSO / Auth0 / RBAC, MongoDB, Cloud-Native SaaS, High-concurrency Platform Design, System Design

Payments & Commerce: Stripe Integration, Credit & Prepaid Billing, Marketplace Payment Flows, Subscription Management, ERP Integration (Oracle NetSuite, Zoho Books), Financial Reconciliation, Procurement

CRM & Integrations: Salesforce (API, Data Sync, Workflow Automation), HubSpot, Zoho CRM, Oracle NetSuite, Third-party Data Integration

Analytics & Data: Big Data Pipelines, Data Visualisation (Power BI, Tableau), A/B Testing, Campaign Analytics, Cohort Analysis, Financial Reporting, GA4, SQL / MySQL

Product Delivery & Agile: Agile / Scrum (Product Owner), Sprint Planning, Backlog Prioritisation, SDLC Optimisation, UAT, User-Centric Design (UCD), Lean Startup, 0 to 1 and 1 to N strategy

Global Market Expansion: International Market Entry, Market Localisation, Multi-region Product Architecture (APAC, MENA, EMEA, Americas), Partner & Publisher Ecosystem Management

Tools: JIRA, Figma, Salesforce, HubSpot, MySQL, MongoDB, Power BI, GA4, Zoho Suite, Firebase

PROFESSIONAL EXPERIENCE

Lead Staff Product Manager - Apr 2025 – Present

Moving Walls Sdn Bhd • Kuala Lumpur, Malaysia

- Deployed the USD 10M investment across four strategic initiatives: (1) AI/ML capability integration, (2) a 12-month full-platform rearchitecture, (3) acquisition of two leading companies and (4) third-party data acquisition.
- Led complete platform rearchitecture: decomposed a decade-old monolithic system into a clean microservices architecture with unified SSO and 5 independently monetisable product lines - adding new revenue streams without increasing engineering complexity.
- Built and shipped an enterprise-grade Identity & Access Management platform integrating Auth0, SSO, and RBAC across SaaS products with automated account provisioning - triggered by CRM lead conversion.
- Designed and launched a full-stack Order Management System integrating Stripe, Zoho Books (finance reconciliation), and Oracle NetSuite (US enterprise ERP).
- Replacing a manual business process with an automated, error-free platform that improved cash flow transparency, eliminated payment settlement delays, supply management, automated reporting and order booking.
- Directed a cross-functional team of 15 including engineers and data scientists plus 7 direct reports running Agile delivery, OKR reviews, and quarterly roadmap presentations to the Board.
- Drive roadmap execution with ~90% delivery accuracy while aligning with business KPIs and customer outcomes.
- Used AI development tools including Replit (rapid product prototyping), Claude Code (agentic specification and code automation), and Antigravity to accelerate product development cycles and reduce time-to-MVP for new feature sets.

Manager — Discovery & Solutions - Apr 2024 – Mar 2025

Moving Walls Sdn Bhd • Kuala Lumpur, Malaysia

- Founded and scaled the Discovery team from zero — establishing a structured customer-driven innovation framework covering hypothesis generation, user research, prototype testing, and outcome-led prioritisation across 5 regional business units.
- Designed scalable multi-market product architecture enabling localised adaptations for APAC, MENA, EMEA, and North American markets without separate codebases or engineering duplication — reducing per-market deployment time by 40%.
- Built AI-based automation pipelines that replaced manual discovery, reporting, and workflow processes — freeing the team to focus on higher-value strategic product work and improving delivery velocity.
- Created the company's first comprehensive internal knowledge base and SLA delivery framework — improving cross-team alignment, reducing onboarding time for new staff, and establishing clear product-to-engineering handoff standards.

Lead Product Manager - Jun 2023 – Mar 2024

Moving Walls Sdn Bhd • Kuala Lumpur, Malaysia

- Developed and scaled B2B SaaS product suite enabling USD 700K in incremental yearly revenue growth through AI-powered campaign optimisation, supply management automation, and advertiser ROI improvements of 25%.
- Led API integrations with Salesforce and Oracle NetSuite — defining technical specifications, managing engineering delivery, and enabling enterprise clients to sync first-party data, billing records, and performance analytics.
- Drove product expansion to South Africa, USA, and Australia by integrating audience datasets — providing the geo-behavioral targeting intelligence required to win and retain enterprise clients in these new markets.
- Managed full product lifecycle end-to-end: ideation and customer discovery, technical specification, prototyping, sprint delivery, UAT, and go-to-market — consistently shipping features on time and within budget.

Product Manager - Jul 2018 – May 2023

Moving Walls Sdn Bhd • Kuala Lumpur, Malaysia

- Built self-serve Demand-Side Platform (DSP) enabling real-time programmatic campaign execution for 1,000+ monthly enterprise campaigns with audience targeting, real-time bidding and inventory management.
- Integrated Supply-Side Platforms (SSPs) to expand addressable inventory to 2M+ assets across markets - negotiating technical integration terms and managing cross-system API dependencies.
- Designed pricing models, subscription tiers, self-serve onboarding flows, and campaign analytics dashboards that achieved 75% enterprise customer adoption and reduced campaign setup time by 50%.
- Translated product requirements and user stories into detailed technical specifications for engineering, working closely across advertiser verticals including healthcare, QSR, e-commerce, and technology sectors.

Business Analyst Sep 2017 – Jun 2018

Moving Walls Sdn Bhd • Kuala Lumpur, Malaysia

- Designed advanced programmatic audience targeting algorithms enabling personalised ad recommendations. Collaborated with data teams to improve DMP and predictive analytics capabilities.
- Led operational gap analysis and process optimisation across product and data workflows, improving operational efficiency by 25%. Conducted UAT and gathered user feedback to drive iterative product improvements.

Forensic Scientist & Workflow Automation Lead Mar 2015 – Aug 2017

iGene Sdn Bhd • Kuala Lumpur, Malaysia

- Defined workflow automation for forensic platforms across multi-country deployments. Supported CMMi Level 3 and ISO 27001 compliance. Conducted data analysis, A/B testing, and user research to improve platform features.

DOCTORAL RESEARCH (DBA) — AI & PRODUCT LEADERSHIP

Thesis: “Orchestrating Intelligence: A New Playbook for Product Leadership in the AI-Driven SaaS Era” Active research investigating three frontier challenges in AI product management:

- (1) How to embed LLMs and generative AI as a structured, governed team member in Agile product organisations, with defined roles, data access policies, and accountability frameworks.
- (2) What level of data should be exposed to AI at each stage of product development, and how to design safe data exposure models that balance AI productivity with IP and compliance risk.
- (3) What skills product managers must learn and unlearn as AI changes the PM role and what new university curricula are needed to prepare the next generation of PMs. This research is directly informed by 11 years of operationalising AI in real enterprise product environments and using AI tools in daily product development workflows.

EDUCATION

Doctorate of Business Administration (DBA) — AI Strategic Innovation

European Institute of Management and Technology, Zurich, Switzerland | 2025 – Present (In Progress)

Master's in Forensic Science

Dr. Hari Singh Gour University, Sagar, India | 2010 – 2012

Bachelor's in Forensic Science

Amity University, Noida, India | 2007 – 2010

CERTIFICATIONS & RECOGNITION

- “Fountain of Knowledge” Award — Moving Walls (Innovation in Programmatic Advertising, APAC)
- Entrepreneur Master — World Masterclass (Aug 2024)
- Agile Fundamentals — Scrum Study (Jun 2018)
- ISTQB Foundation — Malaysia Software Testing Board (Oct 2016)

NOTABLE ACHIEVEMENTS AT A GLANCE

- Secured USD 10M institutional investment from a renowned company in Japan — *largest single investment in company history*.
- Led acquisition of Adarth (India) — including synergy identification, product integration planning, and engineering team onboarding.
- Expanded platform from 5 Asian markets to 20+ global markets (APAC, MENA, EMEA, South Africa, USA, Australia).
- Rearchitected a decade-old monolithic platform to microservices in 12 months — unlocking 5 new independently monetisable product lines.
- Shipped enterprise SSO + Auth0 + RBAC identity platform unifying 5 SaaS products under a single credential system.
- Replaced manual billing with a full Stripe + Zoho Books + Oracle NetSuite integrated payment platform — eliminating human error in financial reconciliation.
- Grew enterprise customer adoption to 75% and platform monthly campaigns to 1,000+ globally with 2M+ inventory assets.
- Uses Replit, Claude Code, and Antigravity daily as AI-powered development and product productivity tools.
