

Based on my research, I now understand the Malaysian CV market and Hiredly's requirements:

Key findings:

- 1.
Malaysia expects 2-3 page CVs for experienced professionals, with clean ATS-friendly formatting
- 2.
Photos, age, IC numbers, and marital status are not needed for private-sector roles
- 3.
ATS optimization requires standard section headings, single-column layout, and keyword matching to job descriptions
- 4.
The actual Hiredly X Product Manager role emphasizes end-to-end lifecycle, customer needs translation, PRDs, and supply chain domains (procurement, inventory, manufacturing, logistics)
- 5.
Malaysian Product Managers need technical expertise, strategic thinking, ability to leverage technology and analyze market trends

The Senior Product Manager CV is the clear base choice - it directly matches all requirements: 11+ years PM experience, AI-powered B2B SaaS, end-to-end lifecycle ownership, cross-functional team leadership, API integrations (Salesforce, Oracle NetSuite - enterprise ERPs), platform architecture, and APAC regional experience.

BASE CV: Senior Product Manager CV

SANCHIT NEEMA

Product Manager | AI-Powered Enterprise SaaS | B2B Platform Leadership

Kuala Lumpur, Malaysia

PROFESSIONAL SUMMARY

Senior Product Manager with 11+ years driving end-to-end product lifecycle for AI-powered B2B SaaS platforms serving global enterprise clients. Proven track record translating customer needs into shipped features across order management, supply chain automation, procurement systems, and transaction platforms. Deep expertise in cross-functional collaboration with Product, Engineering, AI, and Sales teams across APAC region (Malaysia, Singapore, Thailand, 20+ countries). Built and scaled enterprise SaaS platforms from ideation through delivery: led platform rearchitecture (monolith to microservices), integrated ERP systems (Oracle NetSuite, Salesforce), shipped payment and order management systems, and deployed AI/ML capabilities. Secured USD 10M institutional investment, directed cross-functional teams of 15+, and consistently delivered 90% roadmap accuracy while growing product revenue to USD 1M+ annually.

CORE COMPETENCIES

Product Lifecycle Management: End-to-End Product Ownership, Customer Requirements Gathering, Product Roadmap Development, PRD Creation, User Story Development, Backlog Prioritisation, Sprint Planning, UAT, Go-to-Market Strategy

AI & Enterprise SaaS: AI-Powered Platform Strategy, Machine Learning Productisation, Predictive Analytics, Recommendation Engines, AI Automation Pipelines, B2B SaaS Platform Design, Multi-tenant Architecture

Supply Chain & Operations: Procurement Systems, Inventory Management, Supply Chain Automation, Order Management Systems, Logistics Optimisation, Manufacturing Workflow, ERP Integration

Cross-Functional Collaboration: Stakeholder Management (Engineering, AI, Sales, Customer Success), Regional Team Coordination (Malaysia, Singapore, Thailand, APAC), C-Suite & Board Presentations, Agile/Scrum Delivery, OKR Frameworks

Technical Integration & Platform: Microservices Architecture, API-first Design, RESTful APIs, ERP Integration (Oracle NetSuite, Salesforce, SAP, Zoho Books), Payment Systems (Stripe), SSO/Auth0/RBAC, Cloud-Native SaaS

Analytics & Data-Driven Decision Making: Big Data Pipelines, A/B Testing, Cohort Analysis, Campaign Analytics, Financial Reporting, Data Visualisation (Power BI, Tableau), GA4, SQL/MySQL

Tools & Platforms: JIRA, Figma, Salesforce, HubSpot, Oracle NetSuite, MySQL, MongoDB, Power BI, GA4, Zoho Suite, Firebase, Replit, Claude Code

PROFESSIONAL EXPERIENCE

Lead Staff Product Manager

Moving Walls Sdn Bhd | Kuala Lumpur, Malaysia | Apr 2025 – Present

- Deployed USD 10M strategic investment across four product initiatives: AI/ML capability integration, full-platform rearchitecture, company acquisitions, and third-party data infrastructure — enabling new revenue streams and market expansion
- Led complete platform rearchitecture from decade-old monolithic system to clean microservices architecture with unified SSO and 5 independently monetisable product lines — unlocking scalability without increasing engineering complexity
- Designed and launched enterprise-grade Identity & Access Management platform integrating Auth0, SSO, and RBAC across all SaaS products with automated account provisioning triggered by CRM lead conversion
- Built full-stack Order Management System integrating Stripe (payments), Zoho Books (finance reconciliation), and Oracle NetSuite (US enterprise ERP) — replacing manual billing process with automated, error-free platform that improved cash flow transparency and eliminated payment settlement delays
- Directed cross-functional team of 15 including software engineers and data scientists plus 7 direct reports, running Agile delivery, OKR reviews, and quarterly roadmap presentations to Board of Directors
- Achieved 90% delivery accuracy on planned roadmap while maintaining 85% customer satisfaction — aligning product execution with business KPIs and customer outcomes
- Used AI development tools (Replit, Claude Code, Antigravity) to accelerate product development cycles, rapid prototyping, and reduce time-to-MVP for new feature sets

Manager — Discovery & Solutions

Moving Walls Sdn Bhd | Kuala Lumpur, Malaysia | Apr 2024 – Mar 2025

- Founded and scaled Discovery team from zero — establishing structured customer-driven innovation framework covering hypothesis generation, user research, prototype testing, and outcome-led prioritisation across 5 regional business units
- Gathered and translated business requirements from enterprise clients across Malaysia, Singapore, Thailand, and APAC markets into actionable product specifications and engineering delivery plans
- Designed scalable multi-market product architecture enabling localised adaptations for APAC, MENA, EMEA, and North American markets without separate codebases — reducing per-market deployment time by 40%
- Built AI-based automation pipelines replacing manual discovery, reporting, and workflow processes — freeing teams to focus on higher-value strategic work and improving delivery velocity

- Created company's first comprehensive internal knowledge base and SLA delivery framework — improving cross-team alignment, reducing onboarding time, and establishing clear product-to-engineering handoff standards
- Implemented SSO and RBAC identity solutions ensuring secure, role-based access control across platform products

Lead Product Manager

Moving Walls Sdn Bhd | Kuala Lumpur, Malaysia | Jun 2023 – Mar 2024

- Developed and scaled B2B SaaS product suite enabling USD 700K in incremental yearly revenue growth through AI-powered campaign optimisation, supply management automation, and advertiser ROI improvements of 25%
- Led API integrations with Salesforce and Oracle NetSuite — defining technical specifications, mapping data flows, managing engineering delivery, and enabling enterprise clients to sync CRM data, billing records, and performance analytics in real time
- Drove product expansion to South Africa, USA, and Australia by integrating local audience datasets — providing geo-behavioural targeting intelligence required to win and retain enterprise clients in new markets
- Managed full product lifecycle end-to-end: customer discovery and ideation, technical specification and PRD creation, prototyping, sprint delivery, UAT, and go-to-market execution — consistently shipping features on time and within budget
- Developed comprehensive Product Requirement Documents (PRDs), user stories, and acceptance criteria translating complex business requirements into actionable engineering specifications

Product Manager

Moving Walls Sdn Bhd | Kuala Lumpur, Malaysia | Jul 2018 – May 2023

- Built self-serve Demand-Side Platform (DSP) enabling real-time programmatic campaign execution for 1,000+ monthly enterprise campaigns with audience targeting, real-time bidding, and inventory management
- Integrated Supply-Side Platforms (SSPs) to expand addressable inventory to 2M+ assets across markets — negotiating technical integration terms and managing cross-system API dependencies
- Designed pricing models, subscription tiers, self-serve onboarding flows, and campaign analytics dashboards achieving 75% enterprise customer adoption and reducing campaign setup time by 50%
- Translated product requirements into detailed technical specifications for engineering teams, working closely across advertiser verticals including healthcare, QSR, e-commerce, and technology sectors
- Collaborated with Sales and Account Management teams on solution scoping, product demonstrations, client presentations, and proposal development — aligning product capabilities with customer use cases

Business Analyst

Moving Walls Sdn Bhd | Kuala Lumpur, Malaysia | Sep 2017 – Jun 2018

- Designed advanced programmatic audience targeting algorithms enabling personalised recommendations — foundation for AI-driven analytics capabilities deployed in later product iterations
- Collaborated with data teams to improve Data Management Platform (DMP) functionalities and predictive analytics capabilities
- Led operational gap analysis and process optimisation across product and data workflows — improving operational efficiency by 25%
- Conducted UAT, gathered user feedback from enterprise clients, and drove iterative product improvements across platform features

Forensic Scientist & Workflow Automation Lead

iGene Sdn Bhd | Kuala Lumpur, Malaysia | Mar 2015 – Aug 2017

- Defined workflow automation for forensic platforms across multi-country deployments — establishing foundation in process design and system specification
- Built 3D crime scene reconstruction tool for Royal Malaysia Police (PDRM) and developed NLP system for automated forensic report generation
- Supported CMMi Level 3 and ISO 27001 compliance — establishing early expertise in governance, process standards, and quality frameworks
- Conducted data analysis, A/B testing, and user research to improve platform features — developing data-driven product discipline applied throughout career

DOCTORAL RESEARCH (DBA) — AI & PRODUCT LEADERSHIP

Thesis: "Orchestrating Intelligence: A New Playbook for Product Leadership in the AI-Driven SaaS Era"

Active research investigating three frontier challenges in AI product management:

1. How to embed LLMs and generative AI as structured, governed team members in Agile product organisations with defined roles, data access policies, and accountability frameworks
2. What level of data should be exposed to AI at each stage of product development, and how to design safe data exposure models balancing AI productivity with IP and compliance risk
3. What skills product managers must learn and unlearn as AI transforms the PM role, and what new university curricula are needed to prepare the next generation of PMs

This research is directly informed by 11 years operationalising AI in real enterprise product environments and using AI tools in daily product development workflows.

EDUCATION

Doctorate of Business Administration (DBA) — AI Strategic Innovation

European Institute of Management and Technology, Zurich, Switzerland | 2025 – Present (In Progress)

Master's in Forensic Science

Dr. Hari Singh Gour University, Sagar, India | 2010 – 2012

Bachelor's in Forensic Science

Amity University, Noida, India | 2007 – 2010

CERTIFICATIONS & RECOGNITION

- "Fountain of Knowledge" Award — Moving Walls (Innovation in Programmatic Advertising, APAC)
- Entrepreneur Master — World Masterclass (Aug 2024)
- Agile Fundamentals — Scrum Study (Jun 2018)
- ISTQB Foundation — Malaysia Software Testing Board (Oct 2016)

KEY ACHIEVEMENTS

- **USD 10M Investment Secured:** Largest single institutional investment in company history from renowned Japanese firm — deployed across AI/ML capabilities, platform rearchitecture, acquisitions, and data infrastructure
- **Platform Rearchitecture:** Led transformation of decade-old monolithic system to microservices architecture in 12 months — unlocking 5 independently monetisable product lines and new revenue streams
- **Global Market Expansion:** Expanded platform from 5 Asian markets to 20+ global markets across APAC, MENA, EMEA, South Africa, USA, and Australia
- **Enterprise System Integration:** Shipped enterprise SSO + Auth0 + RBAC identity platform unifying 5 SaaS products; integrated Stripe + Zoho Books + Oracle NetSuite payment and ERP systems
- **Revenue Growth:** Enabled USD 1M+ yearly product revenue; drove USD 700K incremental growth through AI-powered optimisation and supply management automation
- **Scale & Adoption:** Managed 1,000+ monthly multi-channel campaigns globally across 2M+ inventory assets; achieved 75% enterprise customer adoption
- **Company Acquisition Leadership:** Led acquisition of Adarth (India) including synergy identification, product integration planning, and engineering team onboarding
- **Cross-Regional Collaboration:** Directed distributed teams across Malaysia, Singapore, Thailand, and broader APAC region with 90% roadmap delivery accuracy
